**ETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-14 and 23-26 are drawn to semiconductor device, classified in class 257, subclass 150.

II. Claims 15-22 and 27-30 are drawn to method of making semiconductor device, classified in class 438, subclass 133.

2. Inventions I and II are related as product made and process of making. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP fi 806.05(f)). In the instant case, instead of partially removing the second insulating layer, in claim 15, the product of invention I can be formed by partially placing the second insulating layer in order to form bores to contact the at least one polysilicon P-N junction and to contact the terminals of the integrated device.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
